

Detailed Stock Quote

Enter Ticker Symbol

```
{runphp}
//stock quote script
//this opens the url for what as entered in the form box above, we are opening it for reading.
//the letters after &f in the url above are the different elements we have requested be pulled into the csv.
//More info about what elements are available can be found at: http://www.gummy-stuff.org/Yahoo-data.htm
$ticker = $_POST['ticker'];
$fopen = fopen ("http://finance.yahoo.com/d/quotes.csv?s=".$ticker."&f=ns!1cmj!kvj1ee7e9e8rr5r6yd1t1&e=.csv", "r");

//this uses the fgetcsv function to store the quote info in the array $csvdata
$csvdata = fgetcsv ($fp, 1000, ",");

//the table with the graph and logic
echo "
```
